

Possible Emotional and Spiritual Consequences of Abortion

"I, too, was just like you – frightened, panicked and feeling all alone. Despite their claims, you know in your heart that what is growing inside you is your baby. Don't make the same mistake I made by letting today's temporary circumstances force you into a decision to kill your child, a decision that you will eventually regret. Abortion was not the answer. It was a cruel and permanent harm to my child, and it left me with shame, anger, self-hatred and hopelessness. Today you have help I never had. Listen to the real friend who gave you this brochure."

Physical Risks with Abortion

- ✘ intense pain
- ✘ infertility
- ✘ problems with future pregnancies
- ✘ breast cancer
- ✘ death

Having your baby is safer than having an abortion.

Your unborn child is an unexpected treasure that God has entrusted to you...

He or she needs your care right now. Don't let the abortionist harm your baby.

These children are alive today because their parents changed their minds about abortion!

THOUSANDS of women have **NOT** kept their appointment with the abortionist.

They have kept their babies instead!

You have the right to have your baby.

Don't let *anyone* deprive you of the love of your son or daughter. When you are holding your baby in your arms, you will know you did the right thing. You will feel proud that you endured a tough situation and gave your child life! (If you would like to talk about adoption, we can help.)

Choose Life - Choose Love!

Early Medical Abortions

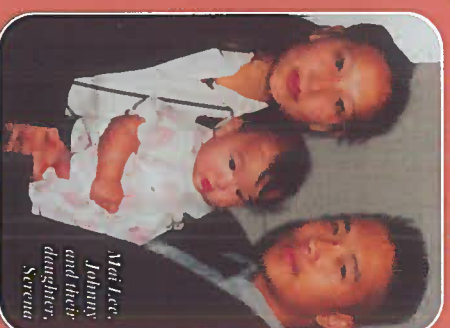

(the "Abortion Pill")

Even if you've already taken the first drug (mifepristone, Mifeprex), your baby may survive and be born healthy. Don't take the second drug (misoprostol, Cytotec)!

Second and Third Trimester Abortions
No matter what the abortion center tells you, laminaria dilators **CAN** be safely removed by a competent doctor, preventing infection and allowing your pregnancy to continue normally. Likewise, if you have taken the drug Cytotec (misoprostol), your baby may still be alive. Let us direct you to a doctor who can help.

"Removing those laminaria dilators was one of the most important choices I have ever made in my life, and five months later a beautiful baby girl was born to me. Serena is such a joy in my life and I thank God for blessing me with her. Each and every day Serena continues to be the example to our friends and family members of how precious life really is."
