"SPECIES HOMO SAPIENS"

- Does the term conform to a **Biblical Creationist** or to a **Darwinian Evolutionistic** Worldview ?

And Should Christian Pro-Lifers seeking to End/Abolish all "Abortion" (via principled Personhood or Abolition Bills), ever use term "Species Homo Sapiens" to refer to preborn human beings created in the image of God in Pro-Life* Bills designed, sponsored and supported by Christians ?

Note For The Record: Incremental child-murder regulation bills (e.g., Heartbeat Bill) are NOT Pro-Life Bills !

Answers:

"No" to second question, because the **Darwinian Evolutionistic** Worldview is the answer to first question !

The term "Homo sapiens" is used and fits in a **Darwinian Evolutionistic** worldview today:

The Genus/Species classification system of Linnaeus placed Mankind in the Animal Kingdom and Primate (Apes) Order, a direct rejection of special revelation in Genesis 1:26,27,KJV that Man and Man alone, not the Animals, is created separately and distinctly in God's image. Man is not just another one of the Animals, which were created separately in Genesis 1:24,25, KJV.

"Homo sapiens"

Scientific classification

Kingdom: Animalia

Phylum: Chordata

Class: Mammalia

Order: Primates

Suborder: Haplorhini

Infraorder: Simiiformes

Family: Hominidae

Subfamily: Homininae

Tribe: Hominini

Genus: Homo

Species: H. sapiens

Binomial name

Homo sapiens

Linnaeus, 1758

Furthermore, as abundantly seen in the "Homo sapiens" article above, classification of human beings as "Homo sapiens" fits the **Darwinian Evolutionistic** paradigm today, which of course rejects Biblical Creation, and therefore rejects Christ, the Creator (Colossians 1:16; Ephesians 3:9, KJV).

Lastly, God gave Man dominion over the Animals (Genesis 1:26,28, KJV). Does it make Scriptural sense that God has given Man dominion over the Animals if Man himself is considered an animal ?
